

MV-WEB

Meter data is a valuable resource for electricity and gas providers. For utilities, ready access to meter data can streamline customer service functions and support special projects and programs. For consumers, the ability to view and monitor consumption and usage trends allows for more informed decision making and cost budgeting.

GETTING THE MOST OUT OF ENERGY DATA

Itron's MV-WEB solution works with the industry-leading MV-90 xi data collection and management system to provide secure, on-line access to critical meter data. A cost-effective data presentation solution, MV-WEB is easily implemented and requires little maintenance. MV-WEB provides an array of user-friendly reports and graphs through an intuitive user interface with no training needed.

READY ACCESS TO CUSTOMER DATA

MV-WEB automates the distribution of meter data within the utility, saving valuable time and resources. Utility engineering and customer services personnel rely on MV-WEB for a variety of uses including:

- » Accessing usage and demand information to address billing inquiries
- » Analyzing and comparing usage trends and behaviors of key accounts
- » Viewing KVA details for transformer sizing
- » Gaining feedback on the performance of special projects such as demand response and green power initiatives

DELIVERING ENERGY MANAGEMENT TOOLS

Providing customers a secure portal for viewing and analyzing their energy usage enhances customer service. MV-WEB benefits the energy consumer by:

- » Reporting historical usage data for energy cost budgeting
- » Delivering metrics on conservation efforts such as equipment and lighting replacement projects
- » Comparing facilities to identify cost savings opportunities
- » Providing power factor and KVA detail for capacitor sizing and viewing power factor correction results

In addition to a variety of industry standard reports and graphs, MV-WEB offers tools for advanced analysis and greater convenience. These tools include:

Data Aggregation

Offers the capability to aggregate data from different meters or channels and run reports and graphs on aggregated results.

Call-On-Demand

With the appropriate rights, MV-WEB users can initiate meter interrogations to receive near real-time data.

Interval Data Download

Enables downloading of meter data to a comma separated file or spreadsheet.

Automated Report Distribution

Allows MV-WEB users to define a schedule for automatically generating and emailing reports and graphs.

LEVERAGING YOUR ENERGY DATA

Optimizing operational efficiency and delivering customer value are priorities for all utilities. With MV-WEB, energy providers can greatly enhance their service offerings and streamline internal processes with little capital investment.

MV-90 PRODUCT LINEUP

MV-WEB is part of a full lineup of MV-90 software solutions offered by Itron. Other solutions in the MV-90 product line include:

Data Collection and Analysis

MV-90 xi is the industry's leading C&I data collection solution, providing a single multi-vendor application for consolidating remote meter reading processes. MV-90 xi can remotely communicate with more than 300 types of electric and gas metering devices while offering a comprehensive set of data processing and analysis tools.

Complex Billing

The MV-PBS complex billing application provides a solution for billing utility customers on complex rates and service contracts. MV-PBS works with MV-90 xi and Itron Enterprise Edition (IEE) applications, streamlining billing processes and providing intuitive rate development tools.

Field Data Collection

MVLT xi is a multi-vendor, laptop solution for downloading load profile and register data from field devices. MVLT xi can read meters using an optical or serial interface and upload data to MV-90 xi.

BENEFITS

- » Intuitive user interface
- » Low cost of licensing and ownership
- » Quickly and easily deployed
- » Improved data access
- » Enhanced customer service
