Universal wM-Bus Driver 5.1 Release Notes

Release Date: March 31, 2025

This release note document describes the enhancements and resolved issue correction made in the Universal wM-Bus Driver 5.1 release.

The Itron Universal wM-Bus Driver application is a tool designed for Automated Meter Reading (AMR) of Itron Smart devices. Features of this tool include:

- AMR reading in 1-way or 2-way mode
- AMR Reading in 1-way mode of any wM-Bus device
- Integration with Temetra Reader, RFCT, or third-party integration applications

Compatibility Matrix

The wM-Bus Driver 5.1 is compatible with the components listed in the following table.

Component	Version
Android OS	7.0 or newer
Bluetooth	5.0 or newer

Upgrading

If you are using RFCT 5.7 or higher, you will receive an automatic notification of new version available. This will do the upgrade to version 5.1

Universal wM-Bus Driver 5.1 is available on the **Customer Center Page** or Itron Private Google Play Store.

Existing licensed users can upgrade to this new release version without a license change.
